

# How a job gets to your **driver**.

The dispatch board, assigning to your own drivers or a vendor, and the step-by-step assign → send → monitor flow on web and mobile.

From docs.tread.ai · English · June 2026

## OVERVIEW

### Dispatching, end to end

Dispatching is the daily act of getting work onto the right driver's phone — from the web dashboard or the mobile app. Your drivers receive, accept, and start jobs on their phones.

#### Tip

New to Tread? Set up your trucks, drivers, and users first (see the Vendor Guide) — then come back here to dispatch.

## WHAT YOU DISPATCH

### Project, Order, Job

A Project is the container; an Order is the daily slice you dispatch; you assign and send the jobs inside an order.

| Concept        | Role in dispatch                                                   |
|----------------|--------------------------------------------------------------------|
| <b>Project</b> | Holds the customer, sites, materials, and rates                    |
| <b>Order</b>   | The day's work: trucks requested, start time, target loads/hours   |
| <b>Job</b>     | One truck's assignment within an order — what you send to a driver |

## THE DISPATCH VIEW

# Your command center for the day

The Dispatch view shows each order's status, truck count, and the per-job rows you act on. Each job moves along this status flow:

## DISPATCH MODES

# Assign to your driver — or a vendor

In the Assign panel you toggle between Driver and Vendor — that choice is the dispatch mode.

| Mode           | Who hauls it                            | In the Assign panel | When to use                                             |
|----------------|-----------------------------------------|---------------------|---------------------------------------------------------|
| <b>Regular</b> | Your own driver                         | Driver tab          | Your own employee drivers and trucks                    |
| <b>Direct</b>  | An Owner-Operator you dispatch directly | Driver tab          | A single-truck hauler whose truck you assign yourself   |
| <b>Hot</b>     | A hauling company that sub-dispatches   | Vendor tab          | A multi-truck vendor; their dispatcher picks the driver |

### Warning

Vendor (Hot) dispatch needs an accepted Vendor connection, and a Direct Owner-Operator must be shared to you — otherwise the job won't send or the driver won't appear. Check [Settings → Vendors](#) and [Settings → Drivers](#).

## BEFORE YOU DISPATCH

# Pre-flight checklist

Three things in place before you send your first job of the day.

## CHECKLIST

- 1 Work exists:** a project and at least one order for the day.
- 2 Trucks & drivers are set up:** drivers added (and invited so they have the app), trucks created, and default trucks paired.
- 3 Connections confirmed (if using vendors):** the Vendor connection is accepted and any Owner-Operator drivers are shared to you.

WEB DISPATCH

## Assign, configure, send, monitor

From the web dashboard — full control over every dispatch.

WEB · DISPATCH

## Dispatch from the web

The numbered markers on each screenshot correspond to the steps.

## Assign a driver (or a vendor)

### STEPS

- 1 Assign** — opens the Driver / Vendor picker on the job row.
- 2 Driver** — assign one of your drivers (Regular) or an Owner-Operator (Direct). Search by name, phone, or truck number.
- 3 Vendor** — hand the job to a hauling company that sub-dispatches it (Hot).

The screenshot displays the software interface for assigning a driver or vendor to a job. The interface includes a sidebar on the left with job status, a main table of jobs, and a dropdown menu for selecting a driver or vendor. Numbered callouts 1, 2, and 3 highlight the 'Assign' button, the 'Driver' tab, and the search input field respectively.

**Job Status Summary:**

| Status    | Count |
|-----------|-------|
| Accepted  | 4     |
| Available | 60/62 |
| Assigned  | 2     |
| En Route  | 0     |
| Loaded    | 0     |
| Unloaded  | 0     |
| Completed | 2     |

**Job Details:**

- Customer: CA DOT • Customer Rate: \$600.00 Per Hour • Material: Dirt • Project: Test Project 4.29 • Phase Code: 42232 • Project Ext ID: 15...
- Start: 1:00 PM Mon Aug-11-2025 • Truck Type: Standard • Pickup: San Francisco Ferry Building-Golden Gate Ferry Terminal, San Francisco, CA 94111, United States • Dropoff: SF Office
- Requestor: Tim Admin • Foreman: Tim Admin

**Assign Job:**

- 155341 Test Project 4.29
- 35442 Torrey
- A Gravel Inver

**Driver / Vendor Selection:**

- 531 • CoastalSam Last
- 151 • Connor Smith
- T31 • Driver C Marco
- 92 • Gary Alexander
- My Truck • Hayden U

## Bulk assign to a vendor (optional)

### STEPS

- 1 Click the **Bulk Assign** (persons) icon at the top right.
- 2 Use **+** to set the number of trucks for the vendor.
- 3 Click **Assign All** to assign every selected job at once.

The screenshot illustrates the TREAD software interface for bulk assigning jobs to a vendor. The interface includes a top navigation bar with tabs like Admin, Sales, Dispatch, Approvals, Live Map, Reports, Sites, and Settings. A left sidebar shows job status filters (Accepted, Available, Assigned, etc.). The main area displays a list of jobs, with one job selected. A modal window titled "Assign To: A56441 • ORD-291768" is open, showing a list of vendors and a numeric input field set to 2. A red circle with the number 1 points to the "Bulk Assign Order" button in the top right of the job list. A red circle with the number 2 points to the numeric input field in the modal. A red circle with the number 3 points to the "Assign All" button at the bottom of the modal.

## Configure the job details

Hover a row and click **Edit** to open **Edit Job**. Confirm the pickup and drop-off sites, the truck and trailer, the start date and time, and the rates. Click **Submit** to save.

## Send the jobs

### STEPS

- 1 Click **Send** on a single row to dispatch that driver.
- 2 Or **Send All Jobs** at the top to send every pending assignment at once. Drivers are notified instantly.

The screenshot shows a software interface for managing orders and jobs. At the top, there are tabs for 'Orders', 'Calendar', and 'Drivers'. A 'Send All Jobs' button is highlighted with a circled '2'. Below this, there is a section for 'McD Cincinnati' with details about the customer, rate, material, and project. A 'Send' button is highlighted with a red arrow and a circled '1'. Below the details, there is a table with columns: Driver & Vendor, Truck & Trailer, Status, Start, Cycle, Requested, Delivered, Materials, Pickup & Dropoff, Driver Notes, Rates, and Bulk Edit. The table contains two rows of job data.

| Driver & Vendor                | Truck & Trailer  | Status  | Start                   | Cycle | Requested | Delivered ... | Materials | Pickup & Dropoff              | Driver Notes | Rates                                    | Bulk Edit   |
|--------------------------------|------------------|---------|-------------------------|-------|-----------|---------------|-----------|-------------------------------|--------------|------------------------------------------|-------------|
| 531 • CoastalSa...<br>End Dump | Truck<br>Trailer | Send    | 01:00 PM<br>12-Aug-2025 |       | 1 Load    | 0<br>0        | Dirt      | Nugent Sand<br>Cincinnati Zoo |              | +\$160.00 Per Hour<br>(\$30.00) Per Hour | TRD-1164000 |
| Assign                         | Truck<br>Trailer | Created | 01:00 PM<br>12-Aug-2025 |       | 1 Load    | 0<br>0        | Dirt      | Nugent Sand<br>Cincinnati Zoo |              | +\$160.00 Per Hour                       | TRD-1164038 |

### Heads up

"Send All Jobs" dispatches every job with an assignment. Double-check the list before clicking.

## Monitor the jobs

Follow each job's **Status**; advance it manually with the down arrow, and follow trucks on the **Live Map**.

### MOBILE DISPATCH

## Dispatch from your phone

The same dispatch — useful when you're away from your desk.

### MOBILE • DISPATCH

## Open the Dispatch tab

Tap, assign, and send — all from the app.

## Open the order & pick a driver

### STEPS

- 1 Tap the order's truck count to expand it, then **+ Assign**.
- 2 Search a driver by name or truck number and tap to select.
- 3 Tap **Send** — instant push notification; the driver accepts and starts from their phone.

YOUR DRIVER RECEIVES

## What the driver sees

Once you send, the driver gets the job on their phone.

MOBILE • DRIVER

### View → Accept → Start

Three taps from offer to starting the run.

01

#### View the request

New offers appear in the driver's **Assigned** tab under **New Tread Requests**. The driver taps **View Request**.

02

## Accept the job

The driver reviews pickup, drop-off, and material, then taps **Accept** (or Decline). Until they respond you'll see **Pending** on your board.

03

## Start the job

The driver taps **Start**. Their location appears on your **Live Map** and the status starts moving.

TIPS

## Tips & common pitfalls

What helps most — and what trips people up.

### Assign to the right place

Use the Driver tab for your own drivers and Vendor for haulers who sub-dispatch. Picking the wrong one is the most common reason a driver never receives a load.

- **Driver didn't get the load?** If status is **Assigned** (not **Sent**), you still need to hit **Send**. If it's sent but the driver shows **Pending**, they haven't accepted yet, or lack the app / location permissions.
- **Vendor (Hot) jobs** show the driver's name on your board only after the vendor's dispatcher assigns one of their drivers.
- Set a **default truck** on each driver so it pre-fills on every assignment — fewer clicks, fewer mistakes.

NEED HELP?

## We're here when you need us.

Pick whichever is fastest for you.

### **In-app chat**

Tap the chat icon in the web app, or open **Account** on mobile.
