

DISPATCH GUIDE

Welcome to the **Dispatch Guide.**

How a job gets from your dispatch board to your driver's phone
— on web and mobile.

JUNE 2026

What you dispatch

A Project is the container; an Order is the daily slice you dispatch; you assign and send the jobs inside an order.

CONCEPT**ROLE IN DISPATCH****Project**

Customer, sites, materials, and rates

Order

The day: trucks, start time, target loads/hours

Job

One truck's assignment — what you send to a driver

The dispatch board

Each order shows its status, truck count, and per-job rows.

Each job moves along this flow:

Dispatch modes

In the Assign panel you toggle Driver vs Vendor — that choice is the mode.

MODE	WHO HAULS	PANEL	WHEN
Regular	Your own driver	Driver	Your employee drivers
Direct	An Owner-Operator you dispatch	Driver	A single truck you assign
Hot	A vendor who sub-dispatches	Vendor	Multi-truck; their dispatcher picks

⚠ Hot needs an accepted Vendor connection; a Direct Owner-Operator must be shared to you.

Before you dispatch

- 1 Work exists — a project and at least one order for the day.
- 2 Trucks & drivers set up — drivers invited, trucks created, defaults paired.
- 3 Connections confirmed (if using vendors) — Vendor accepted and Owner-Operators shared.

Dispatch on web: assign

- 1 Assign** — opens the Driver / Vendor picker on the row.
- 2 Driver** — your driver (Regular) or an Owner-Operator (Direct).
- 3 Vendor** — hand to a company that sub-dispatches (Hot).

Bulk assign to a vendor

- 1 Click the **Bulk Assign** (persons) icon at top right.
- 2 Use **+** to set the vendor's number of trucks.
- 3 Click **Assign All** to assign every selected job at once.

Send & monitor

Edit to confirm sites, truck, date, and rates. Send on a row — or Send All Jobs at the top. Then follow Status and the Live Map.

⚠️ "Send All Jobs" dispatches every pending assignment — double-check the list.

The screenshot displays the TREAD web application interface for managing jobs. At the top, there are tabs for 'Orders', 'Calendar', and 'Drivers'. A date selector shows 'Tomorrow, Tue Aug-12-2025'. A green button labeled 'Send All Jobs' is highlighted with a green circle and the number '2'. Below this, there's a search bar and a 'Filters' button. The main section shows details for a job titled 'McD Cincinnati'. It includes customer information, start time, truck type, pickup and dropoff locations, and a status of 'Pending'. A table below lists job details with columns: Driver & Vendor, Truck & Trailer, Status, Start, Cycle, Requested, Delivered, Materials, Pickup & Dropoff, Driver Notes, and Rates. A red arrow labeled '1' points to the 'Send' button in the 'Status' column of the first row. The table shows two rows of job details, both with a status of 'Created'.

Driver & Vendor	Truck & Trailer	Status	Start	Cycle	Requested	Delivered ...	Materials	Pickup & Dropoff	Driver Notes	Rates
531 • CoastalSa... End Dump	Truck Trailer	Send	01:00 PM 12-Aug-2025	1 Load	0 0	Dirt	Nugent Sand Cincinnati Zoo			+\$160.00 Per Hour (\$30.00) Per Hour
Assign	Truck Trailer	Created	01:00 PM 12-Aug-2025	1 Load	0 0	Dirt	Nugent Sand Cincinnati Zoo			+\$160.00 Per Hour

Dispatch from mobile

- 1 Tap the truck count to expand, then **+ Assign**.
- 2 Search a driver by name or truck number.
- 3 Tap **Send** — instant push notification.

Your driver receives

View the request → Accept → Start. Their location appears on your Live Map on Start.

Tips & support

- If a job is **Assigned** (not **Sent**), you still need to hit Send.
- **Hot** jobs show the driver only after the vendor assigns one.
- Set a default truck on each driver — fewer clicks, fewer mistakes.
